

University of Kentucky
College of Agriculture, Food and Environment
Cooperative Extension Service

Dear Community Member,

Thank you for your support and participation in the Kentucky Cooperative Extension Service Community Needs Assessment. The purpose of this assessment is to better serve you through targeted educational programming.

The Kentucky Cooperative Extension Service is the outreach arm of the University of Kentucky College of Agriculture, Food and Environment and Kentucky State University College of Agriculture, Communities and Environment. With offices in all 120 counties of the Commonwealth, Extension provides practical, research-based educational programs and information.

Extension values community input into educational program development and has from its inception more than a century ago. Every four years, each Extension office prepares a plan of work that includes gathering information from community members as well as secondary data to inform the plan.

Our state is changing, and new areas of need are emerging. To standardize our plan of work process, a committee of Extension personnel and community members developed the community needs assessment process to formalize that data gathering portion.

We expected a large response and we were not disappointed. Over 38,000 people completed the survey. More than 500 interviews and focus groups were conducted. We will use this information to develop local plans of work in our counties as well as regional and statewide initiatives to make a positive impact in the lives of Kentuckians.

We look forward to continuing to serve you.

Sincerely,

University of Kentucky Cooperative Extension Service Administration

ASSESSMENT OVERVIEW

In the fall of 2018, the University of Kentucky Cooperative Extension Service began a statewide assessment of community issues and priorities from across the Commonwealth. County Extension offices led the effort by collecting feedback from various county residents, stakeholders, and organizations. Each county collected feedback through surveys, focus groups, and interviews with community stakeholders. The goal of this project was to gain a better understanding of the needs and priorities facing communities in Kentucky. Gathering information from each county allowed both a broad view of state community issues and an opportunity to detail and address issues specific to counties. Utilizing the results, the University of Kentucky and Cooperative Extension Service can align resources and improve services and partnerships in response to the priority needs of each county. This report is a summary of the data collected in this county.

Community Survey

A community needs assessment survey was developed by a committee representing a mix of county Extension Agents, Extension Specialists from departments across the University of Kentucky, and community stakeholders. The assessment survey was shared with each county Extension office. In turn, Extension Agents invited county residents to participate in the community needs assessment survey. The survey was electronically distributed by social media and email, and was distributed on paper to individuals, groups and organizations to be completed.

Focus Groups

County Extension office staff convened community members in interactive focus groups in the fall of 2018. The focus group listening sessions were designed to allow community members to discuss their ideas on the future of the county in more detail than allowed on the survey. Participants in the focus groups were invited to discuss their vision for a more vibrant county, issues for the future, barriers to issue resolution, resources or information that would help the issues, and ideas for an improved future. A summarized reporting of the results of these listening sessions are included in this report.

Interviews

In addition to the survey and focus group sessions, county Extension Agents also conducted interviews with individuals in formal leadership roles in the county. The interview questioning followed a similar format to the focus groups, seeking information on pressing needs, long term needs, and exploring the role that Extension might serve to address future issues confronting the county.

Secondary Data

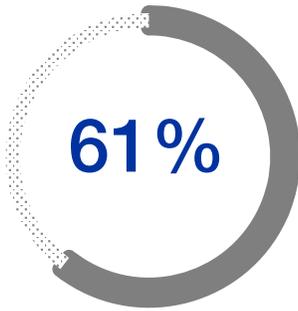

To complement the survey, focus groups, and interviews, detailed data profiles have been compiled for each county that correspond to topic areas covered in the survey. This information provides additional context to understand the role of identified issues in each county as well as historical data to highlight trends.

Next Steps

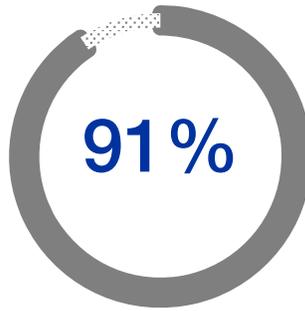

This report summarizes the information collected for this county. The report and the included secondary data compilation can serve as a starting point for deeper investigation into the issues of concern and priority for community members. The University of Kentucky and Cooperative Extension Service will support the county in addressing the priorities identified through this assessment.

SURVEY RESPONDENTS

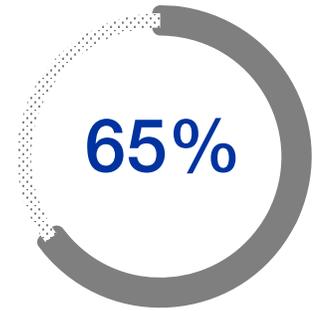

287 Respondents

are Female

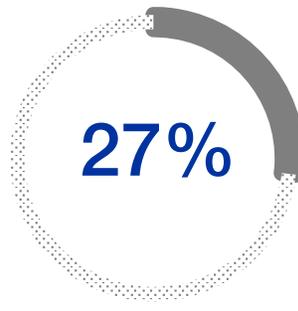

are White
(non-Hispanic)

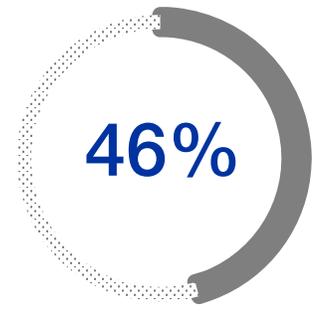

are 25-64 years old
(working age)

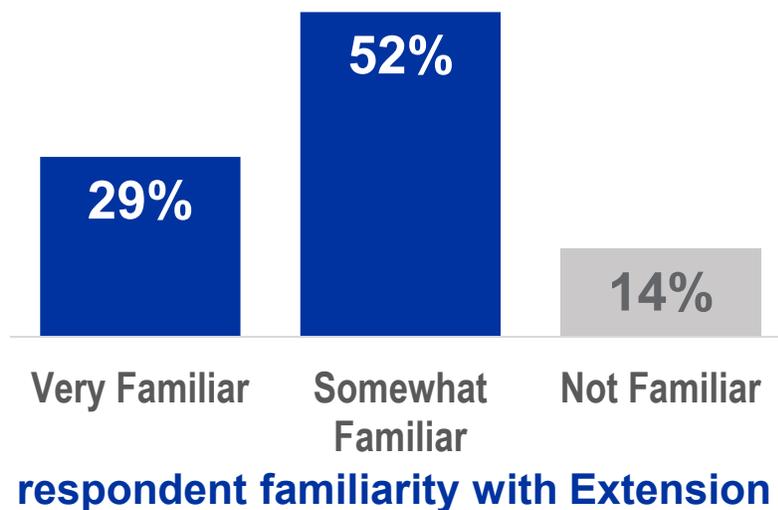

work or are
self-employed

are retired

currently participate
in Extension
programming

ISSUE IMPORTANCE

287 respondents ranked 62 community issues on a scale of “very important” to “not important.”

The table below lists all 62 community issues. The numerical value listed next to each issue represents the average rating across all respondents. Below is the scale used to determine the average rating:

Very important = 4 Important = 3 Not that important = 2 Not important = 1

The table is organized into two columns: the most important issue (on average) is listed at the top of the left column.

Category Legend:

▲ Health and Wellness
 ♥ Youth and Families
 ◆ Agriculture and Environment
 ■ Jobs and Infrastructure
 ● Community Vitality

<p>3.92 ■ More jobs paying good wages with benefits</p> <p>3.87 ■ Safe and accessible public water and sewer</p> <p>3.85 ■ Better utilities (water, sewer, etc.) to attract industry</p> <p>3.85 ■ Trustworthy and effective law enforcement</p> <p>3.81 ▲ Fewer chronic diseases (diabetes, heart disease, cancer, etc.)</p> <p>3.8 ◆ Less illegal dumping and littering</p> <p>3.8 ■ Responsive emergency services</p> <p>3.76 ▲ Fewer overweight or obese youth and adults</p> <p>3.75 ● More qualified leaders to prepare community for the future</p> <p>3.74 ■ Better roads and bridges</p> <p>3.72 ♥ More support for prevention of school violence and bullying</p> <p>3.71 ▲ Safer use of prescription medications</p> <p>3.7 ● More pride in the community and its assets</p> <p>3.69 ◆ Sustainability of family farms</p> <p>3.68 ▲ Better use of food safety practices (hand washing, storage, preservation, etc.)</p> <p>3.68 ■ Increased support for small business</p> <p>3.65 ♥ Better youth and adult career readiness</p> <p>3.64 ■ More qualified employees for existing or new jobs</p> <p>3.64 ♥ Better family skills in reducing debt, increasing savings, and financial planning</p> <p>3.63 ◆ More profitable farms</p> <p>3.62 ▲ Improved affordability of health care insurance</p> <p>3.61 ♥ More support for relatives raising children of family members</p> <p>3.6 ▲ Improved access to quality affordable health care providers (medical, dental, etc.)</p> <p>3.6 ▲ More sources for buying safe, affordable, fresh local foods</p> <p>3.59 ♥ More youth life skills training (money management, life decision making, etc.)</p> <p>3.58 ▲ Improved availability of health care insurance</p> <p>3.58 ◆ More market opportunities for farmers</p> <p>3.56 ▲ More sources for buying safe, affordable, fresh food</p> <p>3.55 ▲ Availability of substance use prevention programs</p> <p>3.52 ■ Access to affordable, reliable high-speed internet service</p> <p>3.51 ♥ More child and partner abuse prevention resources</p>	<p>3.51 ♥ Stronger parenting and relationship building skills</p> <p>3.5 ◆ More awareness and support for agriculture and agribusinesses</p> <p>3.5 ● More citizens helping to solve local issues</p> <p>3.5 ▲ Availability of substance use treatment</p> <p>3.49 ♥ More affordable, quality elder care options</p> <p>3.49 ♥ Affordable, quality child care</p> <p>3.47 ♥ More support for families with mental and emotional health issues</p> <p>3.47 ● More effective cooperation between community organizations</p> <p>3.45 ◆ More crop and livestock production opportunities</p> <p>3.45 ♥ More support for families and individuals with special needs</p> <p>3.44 ▲ Better skills for selecting and preparing healthier food</p> <p>3.43 ♥ More senior citizen support programs</p> <p>3.43 ● More youth community leadership opportunities</p> <p>3.43 ▲ More individual physical activity opportunities</p> <p>3.42 ● More active community volunteers</p> <p>3.41 ◆ More land available for food production</p> <p>3.4 ◆ More training for food gardening skills</p> <p>3.39 ● More community marketing efforts (tourism, industry attraction, etc.)</p> <p>3.39 ● Better employee “soft skills” training (communications, team work, etc.)</p> <p>3.35 ■ Safer community places to walk, run, bike, etc.</p> <p>3.33 ▲ Less pest, disease, and weed issues</p> <p>3.31 ◆ More farm-related jobs</p> <p>3.29 ◆ More part-time and summer job opportunities</p> <p>3.29 ■ More tourism-related businesses</p> <p>3.22 ■ Increased tree and forestry management</p> <p>3.21 ◆ More community gardens</p> <p>3.19 ◆ More public transportation options</p> <p>3.17 ■ Improved sidewalks and crosswalks</p> <p>3.16 ▲ Better landscapes for improved home value</p> <p>3.09 ◆ More healthy snacks and food options at restaurants and community events</p> <p>3.06 ▲ More community parks and green spaces</p>
---	--

TOP PRIORITY ISSUES

After respondents ranked the importance of issues in their community, they were asked to identify the top three priorities for their community in each issue category.

215 respondents chose issues by priority, and the resulting top three priorities for each issue category are listed below.

By prioritizing the issues, respondents are not just identifying how important each issue is for their community, but rather *which issues they would prioritize in their community*.

Jobs & Infrastructure

1. More jobs paying good wages and benefits
2. Better utilities (water, sewer, etc.) to attract industry
3. Better roads and bridges

Agriculture & Environment

1. Less illegal dumping and littering
2. More training for food gardening skills
3. More market opportunities for farmers

Health & Wellness

1. Fewer chronic diseases (diabetes, heart disease, cancer, etc.)
2. Fewer overweight or obese youth and adults
3. Improved affordability of health care insurance

Youth & Families

1. More support for prevention of school violence and bullying
2. More youth life skills training (money management, life decision making, etc.)
3. More support for relatives raising children of family members

Community Vitality

1. More qualified leaders to prepare community for the future
2. More pride in the community and its assets
3. More effective cooperation between community organizations

The Perry County Extension Office convened community members in two interactive focus groups. One group consisted primarily of County Extension Council members and the other consisted of retired public school personnel. The conversations focused on identifying the priority issues facing the county and proposed ideas of what residents would like to see in the future. While focus groups only offer a small sample of attitudes within the county, they do provide insightful first-hand perspectives from residents. The responses from the focus groups are summarized below.

Vision for a More Vibrant Community

The focus groups began by asking participants to describe their vision of a vibrant Perry County. Responses included:

- Strong economic development and assets to provide local, good paying jobs
- A litter and drug free community supporting education, diversity, training, and quality health care
- Leadership and strategic planning for the future
- A built environment supporting a community center for youth

Identified Priorities

- Respond to the drug crisis
- Increase jobs
- Assisted living facilities
- Improved public leadership
- Healthcare
- Affordable housing

Priorities Discussion

Substance abuse was identified as an immediate and ongoing priority issue. Focus group participants also discussed the idea of emphasizing drug prevention efforts in high school. An issue pertinent in many Kentucky counties, focus group participants discussed issues related to drug abuse impact on individuals and families, and about the broader economic and social costs for the community.

Aspects of public governance were discussed the included the need for more realistic planning with balanced budgets. Finding the funds to do what is needed in the county is a challenge, and participants discussed the importance of effective management of existing resources. It was expressed that increased transparency and sharing of ideas and resources between community organizations may increase the impact of community efforts.

Focus group members discussed the value of increased civic engagement, and how it might be fostered in schools. Pressing public needs discussed included increased options for affordable housing, improved healthcare, and improvements to infrastructure, roads, and access to broadband internet. More manufacturing jobs would also be helpful to address pressing needs in Perry County.

Focus group members discussed resources that would be useful to address the priority issues that included: public issues education, job training, increased leadership development, personal financial management, and learning successful strategies from other locations. Projects that support transparency and accountability would be useful.

The Perry County Extension office conducted two separate interviews with a government official and a local business representative. These interviews allowed deeper insight from the perspectives of people highly engaged in community activities. The interview followed a similar format to the focus groups, seeking information on pressing needs, long-term needs, and exploring ways that Extension might serve to address issues confronting the county. The interview perspectives are compiled and summarized to represent key discussion ideas.

Identified Priorities

- Economic growth and development
- Drug epidemic
- Physical activities to positively impact health
- Affordable housing

Priorities Discussion

Interviewed participants identified economic growth as both an immediate and long-term priority. Creation of jobs that pay well, provide benefits, and can support families are very important. Assisting businesses to retain employees is also important.

Tourism was also identified as a priority. Interviewees discussed ideas for strengthening the infrastructure including lengthening the airport runway to accommodate commercial aviation could assist with economic development.

According to the experiences of the respondents, barriers that obstruct addressing the priority issues in Perry County include a lack of personnel and alignment of accessible resources. Additional barriers include the lack of funds or resources offered to the people who are providing local education as well as regional allocation from the state and federal government.

County leaders elaborated about types of information or resources the University of Kentucky and the Cooperative Extension Service could provide to help address priority issues in Perry County. Ideas mentioned include:

- Continued non-traditional education through classes and programs
- Working with county groups and organizations to facilitate collaboration on pressing needs
- Explore ways to utilize reclaimed mine land for agricultural use
- Assist in identifying and measuring small successes to follow with strategies, facilitation, and building toward a greater wave of progress.

UNDERSTANDING YOUR SECONDARY DATA PROFILE

As part of the Community Assessment process, each county is provided with a profile of secondary data. The goal is to supplement the survey, focus groups and interviews with a wide range of secondary data. The data selected for the profiles correspond to the topics covered in the survey and a list of variables provided by the committee that designed the assessment process.

As counties begin to understand the results from their surveys, focus groups and interviews, these data provide an additional dimension to understanding the role of particular issues in each county.

Profile Data

Data in each profile are organized as follows: county demographics; families and households; agriculture; jobs, economy and labor force; youth; and health and wellness. Because we all relate to data in different ways, within each section, the data are presented using three different formats:

- Tabular data
- Narrative
- Graphic

Comparison data over time or comparisons with the state as a whole are provided where space allowed.

County Demographics

Families and Households

Agriculture

**Jobs, Economy and
Labor Force**

Youth

Health and Wellness

Finding More Data

If you need additional data, many sources are available. On the back page of each profile, we provide information for each of the data sources we used. We also provide a list of websites where you may access them.

For easy access to a wide array of data, visit [Kentucky: By The Numbers](#), the [Building Strong Families Profiles](#) from Family and Consumer Sciences Extension, and the [County Data Profiles](#) from the Community and Economic Development Initiative of Kentucky (CEDIK).

If you need help in finding more data or if you need assistance in understanding this secondary data profile, please feel free to contact Dr. Julie N. Zimmerman (jzimm@uky.edu) in the Department of Community and Leadership Development.

Perry County Data Profile

Perry County's Data Profile is provided by the **Kentucky: By The Numbers** program in the Department of Community and Leadership Development for the Community Assessments conducted by the University of Kentucky's Cooperative Extension Service. These secondary data profiles supplement the survey, focus groups, and key informant interviews conducted in each county across the state through the County Extension Offices and coordinated by Community and Economic Development Initiative of Kentucky (CEDIK).

The overall goals for the Community Assessments are:

- To gain a better understanding of the county's pressing issues;
- To enhance Extension's place-based approach by providing information on locally relevant issues in counties;
- To gain a better understanding of how Extension can support important community change to improve Kentucky;
- To provide a statewide view of how top issues are distributed across the state.

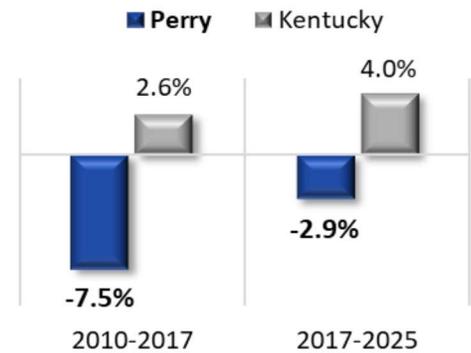

For more information on the Community Assessment process, visit <https://extension.ca.uky.edu/communityassessment>

For additional data or other data-related assistance, contact: Dr. Julie N. Zimmerman (jjimm@uky.edu)

County Demographics

Population	2010 ¹	2017 ²	2025 ³
Total	28,712	26,553	25,771
Ages 65 and over	3,845		5,316

Perry County Priority Responses
215 Respondents

Jobs and Infrastructure

More jobs paying good wages and benefits	59.44%
Better utilities (water, sewer, etc.) to attract industry	15.44%
Better roads and bridges	13.64%

Safe and accessible public water and sewer	10.88%
Trustworthy and effective law enforcement	10.53%
More qualified employees for existing and new jobs	5.61%
Better employee "soft skills" training (communications, team work, etc.)	4.91%
Increased support for small businesses	4.56%
More tourism-related businesses	3.51%
Access to affordable, reliable high-speed internet service	2.46%
Responsive emergency services	2.11%
More public transportation options	1.75%
More part-time and summer job opportunities	1.4%

Agriculture and Environment

Less illegal dumping and littering	43.55%
More training for food gardening skills	39.51%
More market opportunities for farmers	29.72%

Sustainability of family farms	24.91%
More profitable farms	23.86%
More farm-related jobs	14.39%
More support for Kentucky agriculture and agribusiness	10.88%
More crop and livestock production opportunities	9.12%
More land available for food production	8.77%
Increased tree and forestry management	6.64%
More community parks and green spaces	6.29%
More community gardens	5.61%
Better landscapes for improved home value	3.85%
Less pest, disease, and weed issues	3.16%

Health and Wellness

Fewer chronic diseases (diabetes, heart disease, cancer, etc.)	30.31%
Fewer overweight or obese youth and adults	18.18%
Improved affordability of health care insurance	11.54%
Improved access to quality, affordable health care providers (medical, dental, etc.)	10.14%
Better use of food safety practices (hand washing, storage, preservation, etc.)	9.44%
Better skills for selecting and preparing healthier food	8.74%
More sources for buying safe, affordable, fresh food	8.39%
More sources for buying safe, affordable, fresh local foods	8.04%
More healthy snack and food options at restaurants and community events	7.69%
Availability of substance use treatment	7.32%
Availability of substance use prevention programs	6.99%
Improved availability of health care insurance	6.29%
Safer community places to walk, run, bike, etc.	5.24%
Safer use of prescription medications	5.24%
Improved sidewalks and crosswalks	2.1%
More individual physical activity opportunities	1.75%

Youth and Families

More support for prevention of school violence and bullying	22.38%
More youth life skills training (money management, life decision making, etc.)	21.68%
More support for relatives raising children of family members	20.91%
Better youth and adult career readiness	20.63%
Better family skills in reducing debt, increasing savings and financial planning	20.63%
More support for families with mental and emotional health issues	8.74%
Affordable quality child care	6.97%
More affordable, quality elder care options	6.64%
Stronger parenting and relationship building skills	6.29%
More support for families and individuals with special needs	5.24%
More senior citizen support programs	4.2%
More child and partner abuse prevention resources	3.5%

Community Vitality

More qualified leaders to prepare community for the future	47.74%
More pride in the community and its assets	31.12%
More effective cooperation between community organizations	13.99%
More youth community leadership opportunities	13.29%
More citizens helping to solve local issues	12.94%
More community marketing efforts (tourism, industry attraction, etc.)	12.2%
More active community volunteers	8.39%

Re: _____ County Extension Community Survey

Dear _____,

The **Kentucky Cooperative Extension Service (Extension)** is the local outreach arm of the **University of Kentucky** College of Agriculture, Food and Environment and **Kentucky State University** College of Agriculture, Communities, and the Environment. The goal is to provide practical, research-based education that helps individuals, families and communities solve problems and improve lives. Extension provides value to communities through educational programs and information in areas like farming, gardening, parenting, budgeting, healthy living, and youth, community, and economic development.

We are interested in better understanding the issues that are important to you in your community. In response, the Kentucky Cooperative Extension System can tailor new and existing programs to address the highest priority issues that directly impact you, your family and your community. You do NOT need to be familiar with Cooperative Extension to complete this survey. The survey should take no more than 15 minutes to complete and all of your responses will be completely anonymous and confidential.

Please return this survey to (Local office name and address) by _____.

Thank you for taking the time to complete this survey. If you have any questions or concerns, please contact (local office name and phone number).

Sincerely,

Cooperative Extension Service
Agriculture and Natural Resources
Family and Consumer Sciences
4-H Youth Development
Community and Economic Development

Educational programs of Kentucky Cooperative Extension serve all people regardless of economic or social status and will not discriminate on the basis of race, color, ethnic origin, national origin, creed, religion, political belief, sex, sexual orientation, gender identity, gender expression, pregnancy, marital status, genetic information, age, veteran status, or physical or mental disability. University of Kentucky, Kentucky State University, U.S. Department of Agriculture, and Kentucky Counties, Cooperating.

with prior notification.

1. Please rate each of the following community issues on a scale of "Not Important" to "Very Important" by placing a check mark or "X" in the corresponding space. If you are uncertain if an issue is important to your community, select "I don't know."
2. After evaluating the importance of each issue within this category, please select the **TWO** issues you consider the highest priority for your community.

Jobs and Public Infrastructure

	1.					2.	
	Not Important	Not that Important	Important	Very Important	I don't know	Select 2 issues	
More jobs paying good wages with benefits	<input type="radio"/>						
More tourism-related businesses	<input type="radio"/>						
Increased support for small businesses	<input type="radio"/>						
More part-time and summer job opportunities	<input type="radio"/>						
More qualified employees for existing or new jobs	<input type="radio"/>						
Better employee "soft skills" training (communications, team work, etc.)	<input type="radio"/>						
Better utilities (water, sewer, etc.) to attract industry	<input type="radio"/>						
Access to affordable, reliable high-speed internet service	<input type="radio"/>						
Safe and accessible public water and sewer	<input type="radio"/>						
Responsive emergency services	<input type="radio"/>

Demographics

Please select your age:	Under 18	18-24	25-44	45-64	65 and over
	<input type="radio"/>				

Please select your gender?	Male	Female	Non-binary
	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Please select your Race/Ethnicity?	
White, Non-Hispanic	<input type="radio"/>
African-American	<input type="radio"/>
Hispanic, Latino	<input type="radio"/>
Asian-American	<input type="radio"/>
Two or more races	<input type="radio"/>
Other	<input type="radio"/>

What is the highest level of education?	
Some high school	<input type="radio"/>
High school degree	<input type="radio"/>
Some college	<input type="radio"/>
Associate's degree	<input type="radio"/>
Bachelor's degree	<input type="radio"/>
Advanced degree(Masters, Doctorate, JD, MD, etc)	<input type="radio"/>

Please select the option that best describes your current employment status:						
Retired	Unemployed	Self-employed	Do not work	Work full-time	Work part-time	Student
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

How familiar are you with the programs and services of the Cooperative Extension Service?		
Very familiar <input type="radio"/>	Somewhat familiar <input type="radio"/>	Not familiar <input type="radio"/>

Do you, or someone in your family, currently participate in any Kentucky Cooperative Extension Service program?	
Yes <input type="radio"/>	No <input type="radio"/>

What county do you live?	Do you live in the county seat?
<hr style="border: none; border-top: 1px solid black;"/>	Yes <input type="radio"/> No <input type="radio"/>

What other comments and/or suggestions do you have about important issues in your county?
<hr style="border: none; border-top: 1px solid black;"/>
<hr style="border: none; border-top: 1px solid black;"/>
<hr style="border: none; border-top: 1px solid black;"/>

FOCUS GROUP PROCESS

Focus groups are a commonly used method for gathering feedback or perspectives from a sampling of stakeholders. For this initiative, county Extension educators convened two or more small group meetings of community members to facilitate discussion on community priorities. Participants were invited to discuss their vision for a more vibrant county, issues the county is experiencing, barriers to issue resolution, resources or information that would help address the issues, and ideas for an improved future.

The questions were not intended to focus solely on Extension related priorities. Rather, the questions sought to learn about what county residents were concerned about and how those issues impact residents. The focus group also sought to learn what quality of life issues residents are most interested in addressing.

FOCUS GROUP QUESTIONS

- What is your vision for a more vibrant county?
- Based on your experiences, what would you say are the most pressing issues for this county in the next four years?
 - Follow up questions: How do these issues affect you or your neighbors? What other quality of life aspects does this issue affect?
- Based on your experiences, what barriers prevent us from addressing these issues?
- What type of information or resources would help to address the issues?
- Given everything discussed, what final thoughts would you add on being a vibrant county? Have we left anything out?

INTERVIEW PROCESS

County Extension Educators were asked to conduct interviews with individuals in formal leadership roles in each county. These could include elected or appointed government leadership, public service or business organizational leaders, or leaders of healthcare or education institutions. The interview questioning followed a similar format to the focus groups, seeking perspectives on pressing needs, long term needs, and exploring the role that Extension might serve to address future issues confronting the county.

INTERVIEW QUESTIONS

- Based on your experiences, what would you say are the most pressing issues for this county in the next year?
- Based on your experiences, what would you say are the most pressing issues for this county in the next four years?
- What do you see as the broad (county wide) implications of the priorities you have identified?
- Based on your experience, what barriers obstruct addressing the issues?
- What type of information or resources could the University of Kentucky/Extension provide to help address these issues?

UNDERSTANDING SECONDARY DATA RELIABILITY

A key issue in understanding the secondary data profiles is to be aware of the ways in which sources report the reliability of their data. Both margins of error (+/- ##) and confidence intervals (### - ###) tells us the range within which the estimate most likely falls. The American Community Survey provides a margin of error for each estimate. Health data often report a confidence interval as do estimates on poverty and income from the Small Area Income and Poverty Estimates and those on health insurance from the Small Area Health Insurance Estimates.

Because their reliability can vary, we always need to look at the margin of error or confidence interval when we use data from these sources.

While we might not realize it, we encounter margins of error every time we hear about a poll in the news. When we see poll results and they say “plus or minus 5 points,” they are telling us the margin of error.

One way to think about margins of error or confidence intervals is to think of them as our “grain of salt.” We often use this phrase when we need to be cautious about taking something at face value. For instance, if the estimate is 30 (+/- 25), you will want to use a larger “grain of salt” than if your estimate is 30 (+/- 1).

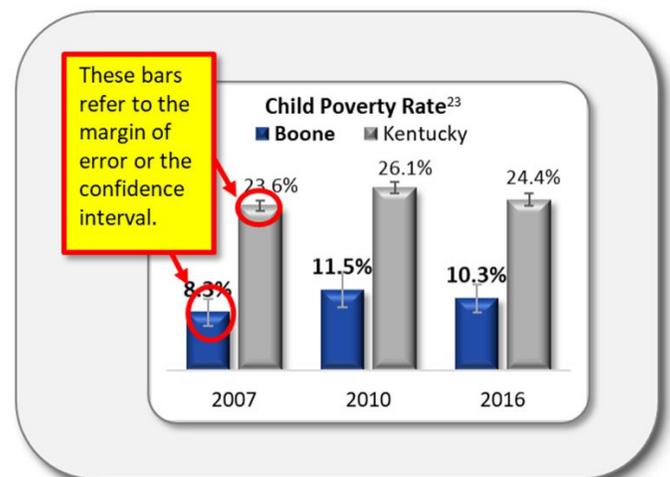

We can also think of margins of error and confidence intervals as “wobble room.” The larger the range, the more “wobble room” there is for the estimate. In other words, when the margin of error is smaller, the estimate is more precise or the focus is sharper. When the margin of error is larger, the estimate is more ‘fuzzy’ or ‘blurry.’

While a confidence interval gives us the actual range, for margins of error (or simply MOE) the plus/minus number gives us the information we need to determine the range. Since the estimate is generally the midpoint, finding the range represented by the margin of error is as straightforward as it seems.

To find the top of the range, add the margin of error to your number. To find the bottom of the range, subtract the margin of error from your number. (Remember, since confidence intervals already give the range, the math is already done.)

In the secondary data profiles, you will see the margins of error (+/- ##) or confidence intervals (### - ###) when they are part of the original data source. You will also see these reflected in the charts. They are called error bars. They look like the letter “I” and are located at the top of each bar.

One reason that margins of error and confidence intervals are important is because there will be times when they can be VERY large. This is especially the case for small groups or small places. Remember that “grain of salt?” The larger the range represented by the margin of error or confidence interval, the more cautious we need to be when it comes to interpreting the data.

It starts with us
